

## Can my business raise finance with Ethex?

We're all about funding extraordinary organisations doing amazing things when it comes to doing good for people and the planet.

We know these pioneering organisations come in all shapes and sizes - from profit-for-purpose businesses, to co-operatives, community benefit societies, social enterprises, charities and more.

What they all share in their DNA is a burning desire to deliver social and environmental impact, good governance, strong values and a business model that can generate investor returns. So if this sounds like your company then read on!

We make sure that we only put the best ethical investing opportunities in front of our community of 20,000+ positive investors, so we only work with organisations that have:

- Proven positive social and environmental benefits that sit right at the heart of the business
- An experienced and committed Board and senior management team
- A business model and financial projections that are suitably robust and appropriate for individual investors
- A business and growth plan that will support a target interest rate of at least 2% (4 - 5% is much more typical) and a clear strategy for repaying investors back over a 5 - 20+ year period
- A desire to raise at least £150,000 in investment
- A deep commitment to creating stakeholder value, not just shareholder value!

If all these points resonate with you, then [get in touch](#) and see how we can help you with your first positive investment raise . Alternatively check out our [raising finance FAQ](#) section (link) for more information.
